

Chip-installation

Note:

Both original and compatible chips are necessary for the procedure below to work!

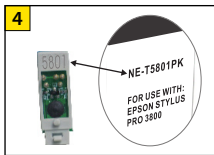

1. Confirm that the packaging contains both ink cartridge and a compatible chip + chip-holder.

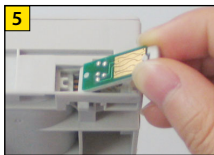

2. Next, carefully remove the **original** chip from the empty original ink cartridge with the edge of a sharp blade.

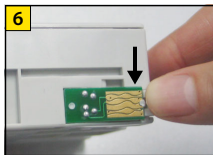

3. Slide this **original** chip into the side of the compatible ink cartridge as shown.

4. Now confirm that the code on the ink cartridge matches the code on the compatible chip-holder.

5. Fit the **compatible** chip + chip-holder onto the **compatible** cartridge as shown.

6. Push down to click it into place, and you're ready to go!
